# Sergei Kharin

Researcher,  
Agricultural Economics

## About Me

I am a research fellow at VSUFT in Voronezh, Russia. My research interests concentrate on time series econometrics and price transmission analysis with a focus on agricultural markets.

I have been really interested in economics since school. After graduating from school, I entered Voronezh State Agrarian University (VSAU), Faculty of Economics. It was not a random choice. Firstly, I live in the Central-Black Earth Region of Russia. It historically formed as an agrarian one, thanks to its exceptionally favorable and unique soil conditions known all over the world. Secondly, The VSAU economic faculty is the oldest of all economic faculties in Voronezh and the largest training and scientific center of education and research in the Central-Black Earth Region in Russia.
